

PEDESTRIAN CRASH ANALYSIS

This map shows pedestrian-motor vehicle crashes along the Tri-angle Bikeway corridor within a 3-mile radius from the potential trail alignment. From 2007 to 2019, there were 945 crashes, 65 of which were serious injuries and 25 were fatal.

Most crashes occurred along major arterials in the study area. High-crash corridors include: NC-54, Raleigh Rd, Manning Dr, Fayetteville Rd, NC-55, I-40, Harrison Ave, Blue Ridge Rd, Lake Boone Trail, Hillsborough St, Western Blvd, and Avent Ferry Rd.

Compared to crash rates of municipalities along the project cor-ridor, the Triangle Bikeway study area has the third highest pe-destrian crash rate per 10,000 residents in 2019.

TRIANGLE REGION PEDESTRIAN CRASH RATES  
(2019, PER 10,000 RESIDENTS)
